weinor
WeiTex

Awning fabrics for the highest demands

Enjoy the difference –
lastingly beautiful awnings through innovative technology

- **Memory effect**
weinor's high-tech polyester fabrics are very elastic. Through the in-built memory effect, the fabrics return to their original shape after being subjected to warmth, giving them a smoother appearance.
- **Spinneret dyeing**
WeiTex fabrics are spinneret dyed. Through this process, the pigment is locked right into the fibres – making them extremely colour-fast even when exposed to intense UV rays. As a result, your fabric keeps its brilliant colour for years to come.
- **Good fabric positioning**
The excellent fabric positioning of WeiTex fabrics reduces the amount of creasing – so your awning fabric will remain beautiful for longer.
- **Nano coating**
The nano-coated surface keeps your fabric well-protected against dirt and mould stains. The Hi-Clean coating simply causes dirt to roll off. The fabric is also highly impervious to driving rain.

weinor WeiTex

Quality versions
at a glance

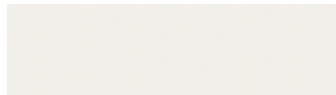

weinor WeiTex Classic

is the lightweight version of the polyester fabric. It is especially suited to awnings and Plaza Home. Its lighter weight reduces fabric sagging to a minimum.

weinor
WeiTex Pro

has a tighter weave and therefore high lateral stability and is therefore especially suited to heavily-used awning systems such as Plaza Pro.

| Grammage: 350 g/sqm, water column: up to 350 mm

| WeiTex Pro for weinor Plaza Pro at no extra charge

weinor
WeiTex Pro Aqua

is the version designed for heavily-used awning systems which are also in frequent use in the rain. The added, somewhat chalk-like, high-tech coating makes the fabric waterproof (when angled at 14° and used with the corresponding support structure). Please note: Do not retract the fabric when wet.
