Toskana

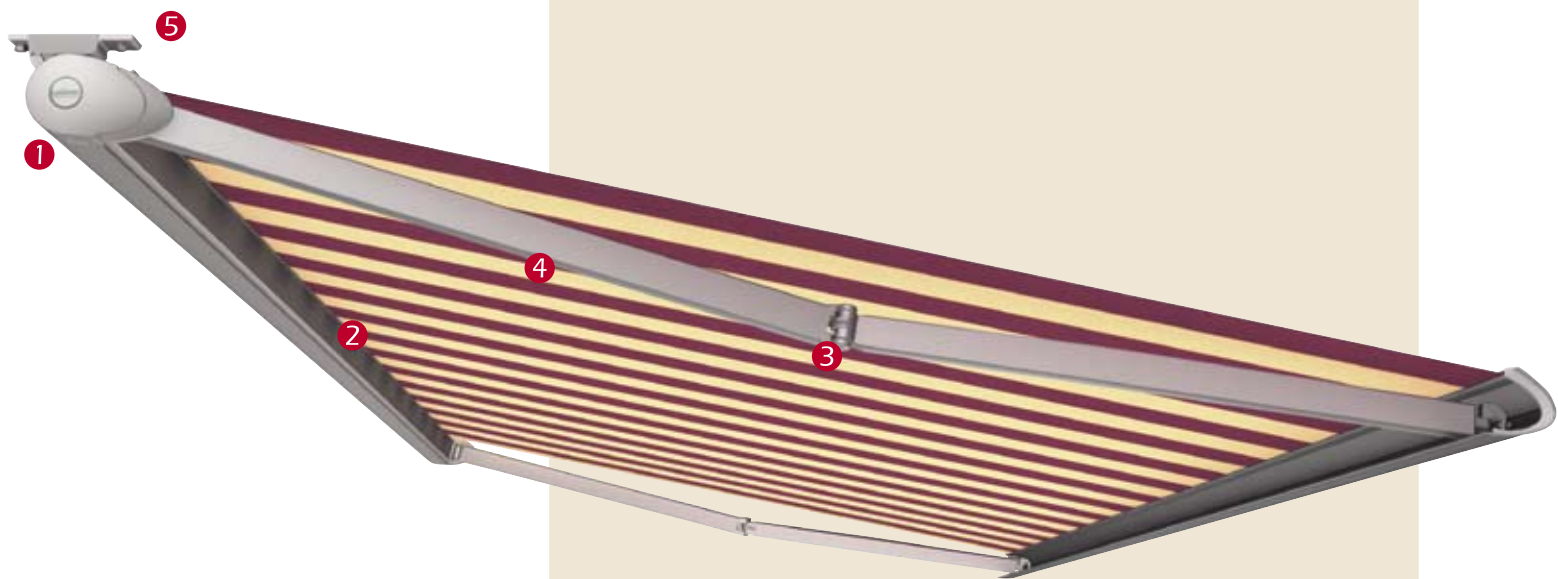

Toskana  
Fabric cover shell option

Small cassette  
awning with a  
large pitch angle

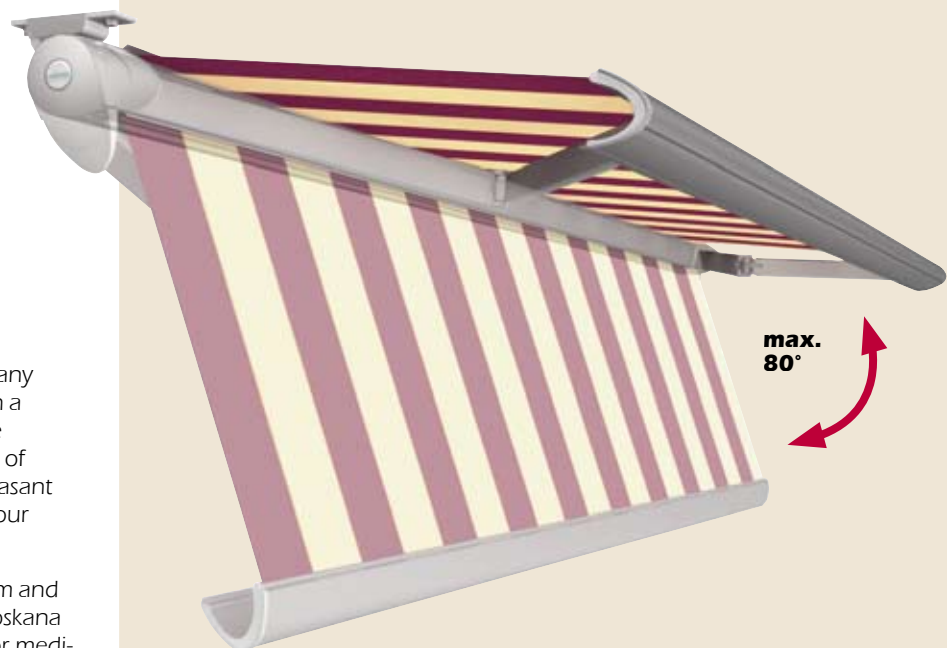

**Lewens**  
SONNENSCHUTZ-SYSTEME GmbH & Co. KG

Small cassette awning that is attractively designed – and attractively priced too

Toscana's elegant design and many refined technical features put it in a class of its own. Combining these aspects with our extensive range of awning fabrics creates a truly pleasant Mediterranean atmosphere on your balcony or patio.

With a maximum width of 500 cm and maximum drop of 300 cm, the Toscana awning is ideally suited to small or medium-sized patios and balconies.

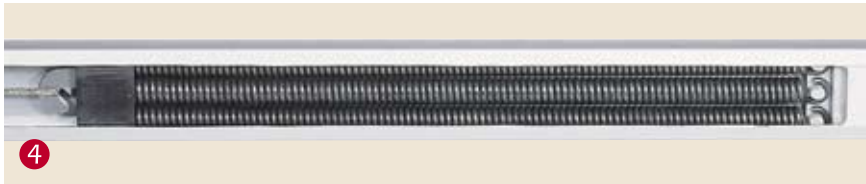

#### Pitch range

Due to the special design of the Toscana awning, a single pitch angle of up to 80° can be set during assembly for ceiling-mounted models with a motor drive, while for geared drives a single pitch angle of up to 55° maximum can be set.

**Toscana offers the perfect solution if you want both privacy and protection from the sun.**

The **extremely high spring tension** of the hinged arms ensures a superbly taut sit of the fabric.

- No resting of the awning cloth on the arm joints.
- Hinged arm joints feature a pin made of high-grade steel. ▼

**Fabric cover shell** ▶

The fabric cover shell is an optional extra offering an elegant solution for concealing the fabric roller.

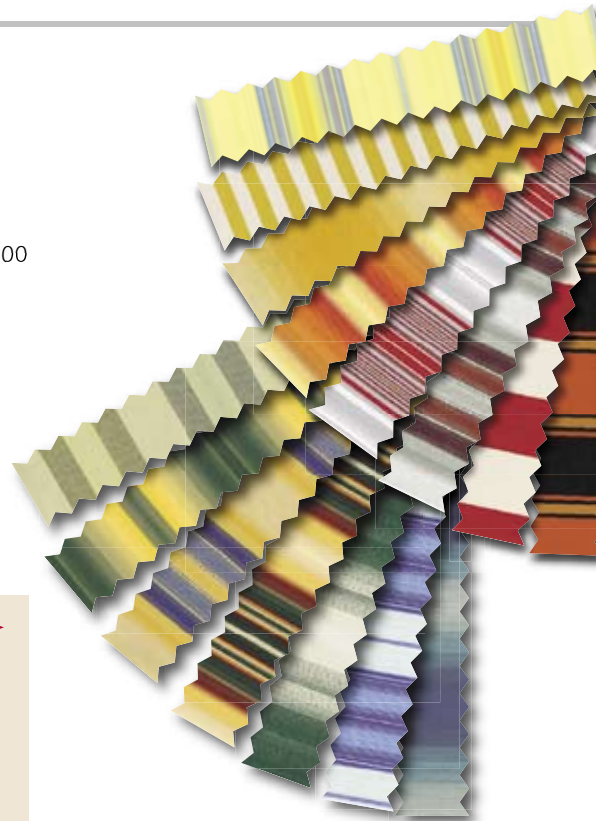

◀ **Hinged arm joint**

The double cables are plastic-coated to prevent soiling and corrosion of the cables caused by exposure to the environment.

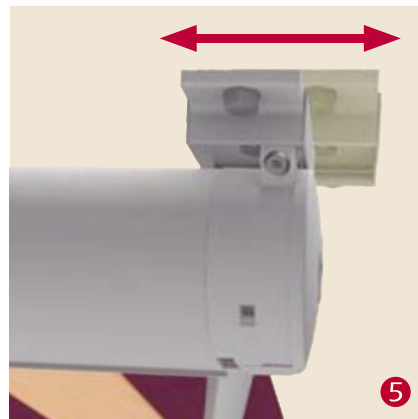

This results in a threefold increase in the service life of the cables (60-80,000 load changes)

- Double cables conforming to aircraft quality standards.
- Arm profile and cables of the same colour.

**Consoles** ▶

Toskana is attached to the wall or ceiling by means of two external consoles. The attachment of the consoles can be varied on this model by moving them sideways (see illustration). This makes fitting of the awning easier.

**Cassette**

Toskana has a pleasing appearance even from the rear.

Fitted to a ceiling, roof projection or balcony, its 13 cm high cassette conveys a harmonious impression. ▼

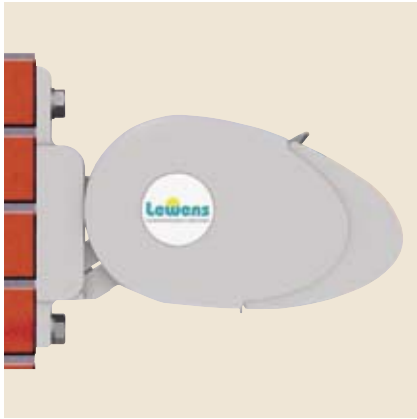

▲ **Fabrics**

Our new collection offers a wide range of patterns spanning the entire colour spectrum.

**End caps** ▶

The plastic end caps can be colour-matched to the awning fabric.
